PROJECTS

RentHub - Mobile App **Jan 2026 - Present**

- Building a unified platform to simplify renting and selling second-hand items through a mobile application.
- Developing a Dockerized backend with secure authentication, product listings, chat, and cloud-based image uploads integrated with a Flutter mobile app.
- Delivering a scalable, deployment-ready marketplace app demonstrating real-world mobile-backend integration and containerized architecture.
- Tech: Flutter | Node.js | Express | MongoDB | Cloudinary | VS Code | Docker | Postman
- GitHub: [RentHub](#)

FoundIt - Website **Nov 2025 - Present**

- Identified the challenge of manually tracking lost items and the lack of a centralized system for users to report, search, and recover lost or found products.
- Designing and building a MERN stack web application with a public dashboard for lost items, advanced search and filtering, image uploads via Cloudinary, and an admin-only verification workflow to validate found items and notify owners.
- Creating a secure, user-friendly platform that improves item recovery efficiency, reduces false claims through admin validation, and enables faster communication between item owners and finders.
- Tech: MERN Stack (MongoDB, Express.js, React.js, Node.js) | Cloudinary | REST APIs | JWT Authentication
- GitHub: [FoundIt](#)

Personal Portfolio | Live Demo **July 2025 - Sep 2025**

- Built a portfolio website to showcase my skills in web development, UI/UX, and design projects.
- Designed interactive sections with dynamic project tabs, scroll animations, and dark/light mode.
- Delivered a responsive, user-friendly site highlighting projects effectively and engaging visitors.
- Tech: Html | CSS | JavaScript | VS Code

Cookify – Food Recipe App

Nov 2024 - April 2025

- Developed a mobile app to simplify meal planning, recipe discovery, and grocery management for users.
- Built with Flutter, integrated Firebase and Spoonacular API, adding features like ingredient-based and recipe name-based search, meal planner, shopping list, user profiles, and community chat.
- Delivered a fully functional app enhancing meal organization and social cooking engagement with secure and smooth performance.
- Tech: Flutter | Firebase (Firestore, Authentication, and Test Lab) | Spoonacular API | VS Code | Figma
- GitHub: [Cookify](#)

SKILLS

Programming Languages: C/C++ | Java | HTML | CSS | JavaScript | Dart

Dev Frameworks: Flutter | Node.js | React.js | Express.js

Tools: NetBeans | VS Code | Figma | Canva (for creative design)

Database: MySQL | Firebase | MongoDB

Cloud Services: AWS | Docker

Design & Multimedia: Video Editing | Graphic Design | Posters & Flyers

Soft Skills: Team Work | Leadership | Problem Solving | Time Management | Quick Learner

Languages: Tamil | English | Sinhala

CERTIFICATION & ACHEIVEMENTS

- Finalist - IdeaPulse 2.0 Organized by Career Guidance Society, University of Sri Jayewardenepura.
- Certificate of Participation - IEEEExtreme 18.0 Organized by IEEE.
- HackerRank Certifications: SQL, Java, Python, CSS, Problem Solving.
- Python For Beginners Certificate - CODL, University of Moratuwa.
- Certificate of Participation - MoraXtreme 9.0 Organized by University of Moratuwa.
- Postman API Fundamental Student Expert.
- 2nd Place in 21 days coding competition - Code Quest Organized by CENSOC, University of Sri Jayewardenepura.
